

# DASH (Disposable Airlock System Housings)

- ★ Self supporting
- ★ 175 Micron Polyethylene sheet
- ★ 1 m x 1 m x 2 m
- ★ Fully disposable after use

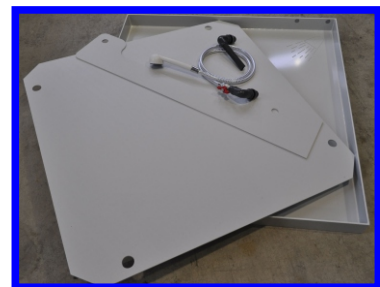

As the name suggests the DASH system of disposable airlocks is a fast and efficient, fully disposable airlock cubicle, that can be erected in 3 or 4 minutes. These can then be joined together to form 3 or 5 stage units in any configuration be it straight through or 'L' shaped.

The disposable airlock is flatpacked down to 1000 mm x 600 mm x 60 mm and includes a weighted flap door. Manufactured from 175 micron polyethylene sheeting, heat welded at the seams and supported by a unique frame system constructed out of 'Correx' boarding. The whole system can be disposed of at the end of it's use.

## Accessories :

Reuseable ABS Floor tray with raised insert  
shower head with valve  
fittings and support brackets
