

ASTROCAB 1000 Modular Hygiene System

The Astrocab 1000 Modular Hygiene System (MHS) has been developed to provide a fully functioning decontamination facility that can be placed where you want it rather than in a car park 100 metres away. No tools are required to construct the unit, all the internal fittings simply clip onto the brackets bonded to the door panels.

The unit is supplied with a locker for valuables, 2 bench seats, 2 hook/mirror plates and a hand wash basin. LED lights can also be added as an additional feature. A AstroAir V35 Negative Pressure Unit (NPU) attaches to the NPU wall panels and creates the negative pressure within the unit (see separate documentation).

This standard unit is available in 3 stage, additional stages can simply be added if needed. The size of a standard unit is 1.0M x 1.0M x 2.M (height).

We have manufactured many different sizes of the Astrocab 1000 MHS for our clients throughout the UK and Europe, so if you have a specific requirement, please contact us. Your companies logo can also be engraved onto the Astrocab wall panels at no additional cost.

A range of Aquarius Water Management Systems (WMS) are available in 50, 150, 250 and 400 litres to add showering and waste water facilities to the unit.
