

ASTROCAB 1200 Modular Hygiene System

The Astrocab 1200 Modular Hygiene System (MHS) has been developed to provide a fully functioning decontamination facility that can be placed where you want it, rather than in the car park 100 metres away. Making it an ideal solution for larger jobs where there are space constraints for mobile units. No tools are required to construct the units, all internal fittings simply clip onto brackets bonded to the door panels. The unit is supplied with a locker for valuables, 2 bench seats, 2 Hook/Mirror plates, wash hand basin, 3 LED lighting units and a AstroAir V35 Negative Pressure Unit which clips onto the NPU wall panel (see separate documentation).

We have manufactured many different sizes of the Astrocab 1200 MHS for our clients in the UK and Europe, so if you have a specific requirement please contact us. You can also have your company logo engraved onto the Astrocab wall panels at no additional cost.

When erected the 3 stage Astrocab 1200 MHS is 3520mm Long x 1160mm wide x 2120mm high (without lights). However to allow for full door swing and (Water Management System & Negative Pressure Unit) you should allow for a footprint of no less than 1600mm wide x 4520mm Long. A joining frame is also available should you want to extend the sizes of the cabins from the standard 1.2M x 1.2M to 2.4M x 1.2M.

A range of Aquarius Water Management Systems (WMS) are available to suit this unit (please see separate documentation for details).
